MachineryLink Introduces New Combine+Operator+Platform Program

Kansas City, MO (May 15 2010) - MachineryLink, Inc., the leading provider of combine leasing programs to agricultural producers in North America, announced today the launch of the Combine+Operator+Platform (COP) Program for soybean and sorghum growers.

In response to market demand, MachineryLink has constructed a special program for Midwestern growers of 1,000 acres or more of soybeans and/or sorghum. Matching a Class VII John Deere 9770 STS combine with a MacDon 35' Draper head and an experienced operator trained in maximizing the efficiencies of this state-of-the-art equipment makes the COP program a perfect fit where extra capacity is required or when the harvest window has narrowed.

This program is being introduced on a limited scale in 2010, with additional capacity scheduled for 2011. COP deliveries will initiate in late August and continue into the fall harvest. A flat rate per acre makes this a simple, cost-effective way to harvest

About MachineryLink, Inc.

MachineryLink (www.machinerylink.com) is the leading and fastest growing provider of combine leasing programs to agricultural producers in North America. Its headquarters are in Kansas City, MO, with operational centers in Pratt, KS and N. Sioux City, SD. The company also maintains seasonal service facilities in five locations across the United States. MachineryLink's unique Managed Lease program allows growers to significantly lower their equipment costs by providing the latest harvest technology and equipment with guaranteed delivery and pick-up.
