

**Title: Ag Systems Program Manager**  
**Location: Kansas City**  
**Department: Operations**  
**Schedule: Full-time**

The Ag Systems Program Manager will develop an application to maximize machine and operator productivity using advanced farming technologies. This position reports to the Vice President of Fleet Management and Field Operations and is located at our Kansas City office.

The ideal candidate will have five years of experience in precision ag management systems utilizing telematics and GPS, as well as a bachelor's degree in engineering or computer systems.

MachineryLink is the leading and fastest growing provider of combine leasing programs to agricultural producers in North America. The company started with three combines in 2000, and today maintains the largest private fleet of combines in North America. Our headquarters are in Kansas City, MO, with operational centers near Wichita, KS and North Sioux City, SD.

We are a hyper-growth company and are looking for individuals who want the challenge and professional growth associated with building a new marketplace.
